

FOOD, FRIENDS AND FUTURE

International week, 4th to 9th of May 2025 University College South Denmark, Haderslev

In "Food, Friends and Future", we explore our European culture to develop teaching with focus on creating a better and sustainable European society.

We explore European food as your grandparents made food to your parents. Together we preserve European food-culture on our Food, Friends, and Future webpage.

We redevelop the European Cuisine with a sustainable lens and enjoy making and eating redefined sustainable food together. During the week we will also have an evening class, where we eat, discuss, and enjoy intellectual together-time.

Be prepared for dialogue in class, school visits, and for discovering and redefining cultural traditions in Europe.
